## A NATURAL WAY TO YOUR WELLNESS

ome to the world of Natural Wellness. The idea is to provide you with a better quality of life through enhanced health and wellness. As a part of its continual endeavor of bringing innovative products and services, INFLUX has developed a range of wellness products under

FEELGOOD WELLNESS SERIES.

hange your life for better. Solve many of your present health problems and enhance your day to day living with Feelgood Wellness Series products.

It's safe, cost effective and easy to use.

## Bio Magnetic Energy - Ancient wisdom, Modern use:

Today, many people believe that certain places on earth, such as Lourdes, France, Sedona, Arizona owe their healing powers to high level of Bio-magnetic energy. The Chinese have referred to this energy as 'Chi', the Japanese as 'Ki', Indians as 'Prana' and even the Native Americans referred to it as 'Orenda'. Reiki Practitioners refer to the healing powers of the Universal Life Force to describe this energy field. Clinical studies and personal evidences suggest that people experience a beneficial effect on exposure to magnetic energy. Hundreds of studies are available worldwide on fixed and pulsed magnetic therapy. Evidences show that it stimulates and enhances the body's natural healing process. Studies suggest that Electro-Magnetic Energy is even more beneficial than stationary magnets. The father of modern medicine and Greek Philosopher Hippocrates wrote several thousand years ago, "The natural force within each of us is the greatest healer of all."

Electrical activity in the body is essential. Our bodies need the energy provided by free electrons. We usually get them from food, water and air we breathe. These "free" electrons, (Chi, Ki, Prana, Orenda, Universal Life Force) are the catalyst, the life force that

burns oxygen in the cells. It is believed that magnetic energy field and Bio-magnetic energy levels in the body determine its resistance to "dis-ease" (disease) and aging. The body behaves like a battery. It can be charged and discharged and even drained of energy. Most "dis-ease" (disease), from the common cold to cancer can manifest itself in a run down body, one that is weak and low in energy. The food, water and air that we consume everyday unfortunately may not have the levels of electrons necessary for us to maintain a health and fully charged body.

Life developed under the influence of the earth's magnetic field. It logically follows that magnetism and the interference with the body's electromagnetic activity play such a major role in health and in disease. The ancient Greeks discovered lodestone, a magnetic rock that had healing properties. The early Chinese recorded the use of magnets in medical literature. Medical use of magnets has been reported throughout the ages and in recent years, has been the subject of worldwide interest.

Although they may seem magical in their capacity to heal, magnets are not magic. Their function is very simple. Magneto therapy assists the body to regain its self healing electromagnetic balance naturally. The body, each organ and each cell of every organ is

influenced by electromagnetism. Cell regulation, tissue function and life are controlled by electromagnetic currents.

Lack of magnetism, as outlined by Dr. Nakahowa in his classic paper "Magnetic Deficiency Syndrome", may cause stress, mental disorders, headaches, arthritis, muscle pain, osteoporosis, chronic fatigue, allergies, insomnia, inflammation, circulatory problems, bowel disorders and many other degenerative problems afflicting people today.

Bio Magnetic Therapy is the application of magnetic fields and magnetic ion on parts of the body to speed healing, relative pain and inflammation, and improves bodily functions. The magnetic therapy simulates the earth's magnetic field and places your body in an optimum environment to heal itself. The physiology of the wide range of benefits is not completely understood but it is believed to come from increased blood circulation for greater supplies of oxygen and nutrients and improving removal of contaminants and toxins from body tissues. The magnetic therapy simulates the earth's magnetic field and places your body in an optimum environment to heal itself.

# **Science & Bio Magnetic Therapy**

Most research on bio magnetic therapy has been done on magnetic effects on the brain and neurological disorders. It has been recognized that electricity and magnetism are independent but yet are still connected; passing a current through a coil of wire causes a magnetic field that is perpendicular to the current flow in the coil. The type of magnetic therapy being used in the scientific arena most often is transcranial magnetic stimulation (TMS). The Archives of General Psychology, in an article titled Transcranial Magnetic Stimulations: Applications in Neuropsychiatry by Mark S. George MD, describes the process as placing an electromagnetic coil on the scalp, while a high-intensity current is rapidly turned on and off. It produces a magnetic field that lasts for an extremely short amount of time (100 to 200 microseconds). The strength of the magnetic field is 40,000 times greater than the earth's magnetic field. This causes a sufficient current in the brain to produce neuronal depolarization. The treatment is not a pleasant one and the higher the frequencies the greater the pain. The pain is felt in the facial and scalp muscles that result in muscle tension headaches. The headaches can be alleviated with aspirin.

In 1998, Toledo Hospital in Ohio conducted a case study about the use of magnetic therapy on a chronic abdominal wound. The case study involves a 51 year old paraplegic woman who had an abdominal wound for one year. After exhausting traditional approaches to cure

the wound, she allowed a magnet to be placed over her wound dressing. The results: after 1 month, the wound was completely healed. There has been various resear00ches & experiments worldwide which has proven the positive effect of Bio Magnetic Therapy.

After researching this topic thoroughly, it is clear that bio magnetic therapy is on the rise; marketers and doctors alike are becoming extremely interested in the topic. This form of alternative medicine/therapy is fortunately a scientifically researched topic, therefore there are studies that have shown when magnets works and when they don't. This therapy should be treated like most any other form of alternative medicine, it is not a replacement for standard medical treatment, but it is an option, an alternative, when making a decision about when which road to take in one's health highway.

A last thought: if you are injured in an automobile accident and your body is mangled, you will choose the standard medical route- go to the emergency room. But, now it is two years later and you have chronic back pain from the accident, wouldn't you try a scientifically researched alternative form of medicine just at the chance that it could free you from your two-year chronic back pain. Bio Magnetic therapy should be given a chance at helping certain biological and psychological problems; scientific research has proven it is worth a try.

# **Three Beneficial Energies**

Magnetic ION

Negative ION

Far Infrared Rays (FIR)

# **Magnetic ION**

Magnetic therapy has been around for a very long time indeed, in ancient China, India, Egypt, Persia and Greece; its path was both known and followed. The Russians also have a long history of its use, and in some of the dark days of World War II, Soviet soldiers were often treated with magnets in the front line, as more conventional medicinal supplies ran dry. The Russians are a practical people after all, if something works they will use it, and clearly it did. Not for them was time wasted on theoretical arguments about the doubts, claims and counterclaims that we are familiar with today: there was an invader to be thrown out after all, and all had to play their part in the fight. In Japan, magnetic therapy is officially recognized by the Ministry of Health, and all across the east, magnets are commonly seen being prescribed for use.

Magnetic ION improve blood circulation, relieve backaches, joint pains (arthritis), chronic pain, insomnia, muscle aches, headaches, repetitive strain, carpal syndrome, swelling, low energy, sport injuries and many more.

# **Negative ION**

Negative Ions Create Positive Vibes. There's something in the air that just may boost your mood - get a whiff of negative ions. Negative ions are odorless, tasteless, and invisible molecules that we inhale in abundance in certain environments. Think mountains, waterfalls, and beaches. Once they reach our bloodstream, negative ions are believed to produce biochemical reactions that increase levels of the mood chemical serotonin, helping to alleviate depression, relieve stress, and boost our daytime energy.

Ions are molecules that have gained or lost an electrical charge. They are created in nature as air molecules break apart due to sunlight, radiation, and moving air and water. You may have experienced the power of negative ions when you last set foot on the beach or walked beneath a waterfall. While part of the euphoria is simply being around these wondrous settings and away from the normal pressures of home and work, the air circulating in the mountains and the beach is said to contain tens of thousands of negative ions - much more than the average home or office building, which contain dozens or hundreds, and many register a flat zero.

"The action of the pounding surf creates negative air ions and we also see it immediately after spring thunderstorms, when people report lightened moods," says ion researcher Michael Terman, PhD, of Columbia University in New York.

In fact, Columbia University studies of people with winter and chronic depression show that negative ion generators relieve depression as much as antidepressants. "The best part is that there are relatively no side effects, but we still need to figure out appropriate doses and which people it works best on," he says. Generally speaking, negative ions increase the flow of oxygen to the brain; resulting in higher alertness, decreased drowsiness, and more mental energy," says Pierce J. Howard, PhD, author of *The Owners Manual for the Brain: Everyday Applications from Mind Brain Research* and director of research at the Center for Applied Cognitive Sciences in Charlotte, N.C. You may feel sleepy when you are around an air-conditioner, but feel immediately refreshed and invigorated when you step outside or roll down the car window. Air conditioning depletes the atmosphere of negative ions, but an ion generator re-releases the ions that air conditioners remove.

## Health Benefits of Negative ION

Just as positive ions build up in the atmosphere prior to a storm front; negative ions accumulate following a storm. This surfeit of negative ions has long been associated with improvements in mood and physical health. Research conducted in the last decade has begun to support the view that negative ions have a net positive effect on health.

Researchers at the Russian Academy of Sciences in Moscow discovered that negative ions are able to help protect the body from induced physical stress. British researchers at the Centre for Sport and Exercise Sciences in Liverpool exposed male subjects to negative ions and measured physiological responses, including body temperature, heart rate and respiration, while at rest and during exercise. Negative ions were found to significantly improve all physiological states, particularly during rest. Most important was the findings that negative ions are "biologically active and those they do affect the body's circadian rhythmicity."

# Far Infrared Rays (FIR)

Far infrared is the invisible band of energy that is part of the sun's spectrum. Far infrared is the segment that provides the greatest output from the sun and is split into three different wavelengths. Of these wavelengths, in the region of four to fourteen microns are the safest and most beneficial to life. The infrared heat rays warm the body directly. The body then absorbs as much as 93% of the heat generated by this healing energy. All life requires FIR heat from the sun. FIR heat is not ultraviolet radiation but a narrow band of energy within the 5.6 to 15 micron level. This type of energy travels 2-3" deep into the body to increase circulation and nourish damaged tissue.

The sun is the primary source of radiant energy, but not all of this energy is beneficial to your body. Although life needs energy from the sun, too much harsh sunlight damages the skin. FIR heat provides all the healthy benefits of natural sunlight without any of the dangerous effects of solar radiation. FIR infrared ray energy is a part of the natural light spectrum of sunlight, minus the skin damaging UV, which is why NASA spacecraft have utilized this heat. In Asia and Europe it has already revolutionized health and beauty products. Far Infrared ray is a form of light energy form the sun. It falls within the same family of Infrared Rays in the light spectrum, but due to its longer wavelengths human eyes, just like Ultraviolet Rays, cannot see FIR. The energy is ESSENTIAL & BENEFICIAL for all human beings.

FIR has the ability to penetrate, refract, radiate & reflect. The human body can absorb FIR because of its deep penetrating ability. When FIR

penetrates through the skin to the subcutaneous tissues, it transforms from light energy into heat energy. The thermal effect within the deep layers of tissues cause blood vessels in capillaries to dilate, promoting better blood circulation, and the heat produced helps to get rid of body toxins and metabolic wastes through sweating.

### What the researchers say about FIR

Hundreds of years ago, people discovered and turned to heat therapy as a source of natural healing for many illnesses and discomforts. FIR heat is simply and naturally rising to the top of health regime requirements. Activated by heat, the FIR material emits FIR energy that is absorbed by human cells, causing a physical phenomenon called "RESONANCE". Thus, the cellular activities are instantly invigorated, resulting in better blood circulation and an overall improved metabolism. FIR heat therapy can aid in weight loss by speeding metabolic processes of vital organs and endocrine glands resulting in a substantial caloric loss in a heat session. It also increases heart rate and blood circulation, both crucial to maintaining one's health. The heart rate increases as more blood flow is diverted from the inner organs towards the extremities of the skin without heightening blood pressure.

Infrared energy is not only safe, but also highly beneficial for our bodies. Far Infrared Rays are actively used for medical treatments by Doctors, Chiropractors, Acupuncturists, Physical Therapists, and Massage Therapists for arthritis, joint pain, stiff muscles, injuries to tendons and ligaments to promote a faster self-body healing effect.

# **Feelgood Bio Magnetic Bracelet**

### The Product

Feelgood Bio Magnetic powered bracelets are designed with features that incorporate the advantages and distinctive effects of 3 types of energy - Magnetic Ion, Negative-Ion and Far Infrared Ray (FIR). Outstanding beneficial effects can be experienced in our body by this Bio Magnetic Bracelet with the 3 beneficial energies lined up over the main arteries at the wrist.

Some types of pain and illness are associated with imbalances in these biological electric and magnetic fields. Bio-electro-magnetic therapy realigns the fields to correct imbalances and bring relief in a number of common conditions including Arthritis, Joint and Muscle Pain, Shoulder Pain, Back Ache, Neck Ache, Period Pain and Stress.

Magnetic Ion improve blood circulation, relieve backaches, joint pains (arthritis), chronic pain, insomnia, muscle aches, headaches, repetitive strain, carpal syndrome, swelling, low energy, sport injuries and many more.

Negative Ions are created naturally in nature by the energy associated with waterfalls, rolling surf and lightning. Negative ions are negatively charged particles form when enough energy acts on a molecule to eject an electron. This displaced electron then attaches itself to a nearby molecule, which then becomes a Negative Ion.

Far Infrared Ray (FIR) activates water molecules in the body which these molecules increase blood circulation and metabolism efficiency.

# **Feelgood Bio Magnetic Bracelet**

### **Its Benefits**

Feelgood Bio Magnetic Bracelet is designed for stimulating your body to combat pain and give you complete wellness. It works wonder on illnesses like:

- Arthritis & rheumatism
- Joint & Muscle pain
- Shoulder pain
- Back ache, head ache and neck ache
- Respiratory problems: coughs & asthma
- Constipation
- Inflammation
- Insomnia
- Jet lag
- Stress etc.

## How to use

Simple wear it on your wrist like a watch. It will add value to your style and will give you comfort & health. Wearing this innovative bracelet on your hand will make you feel good.

A holistic approach to provide consumers life-enhancing health benefits to fight stress, fatigue and discomfort of everyday modern living. Feelgood Nellness Products are packed in decorative boxes. It is an ideal gift you can give to yourself or to someone you love.

# PREVENTION IS BETTER THAN CURE

Even if you are in excellent health and do not seem to need the Bio Magnetic Bracelet,

Prevention is better than cure.

Use the Bracelet for Prevention,

it doesn't cost you much.

A Natural Way to Your Wellness
